

Introducing the ICWMK-HP23 VESA Mount Adapter and complete Wall Mount Kit for the HP Touchsmart 600 Series Desktop and HP Touchsmart 9100 Business PC

Provides the ability to attach the HP Touchsmart to VESA compliant mounting devices, or use the Flush Wall Mount Bracket included with each kit to mount directly to the wall.

The ICWMK-HP23 is a custom mount adapter kit designed specifically for the HP Touchsmart 600 Series all-in-one desktop and HP Touchsmart 9100 Business PC. The ICWMK-HP23 allows for these Touchsmart models to be mounted with a VESA compliant mount, such as a wall mount bracket or articulating arm, that provides the VESA 100 attachment and correct weight capacity for the Touchsmart. In addition to the VESA mount adapter, each kit includes a flush wall mount bracket to mount the HP Touchsmart directly to the wall.

- The ICWMK-HP23 integrates with the existing stand attachment interface on the back of the HP Touchsmart. Patent pending design requires no modifications made to the HP Touchsmart computer ensuring warranty is not voided. Unique support arm design eliminates stress on the back of the Touchsmart from repeated vibrations associated with touch-enabled screen operation.
- The ICWMK-HP23 provides the correct support and mounting interface for 23" HP TouchSmart models to be attached to VESA 100 compliant mounts.
- All steel, welded construction with durable powder coat finish. 100% Proudly Made in the USA. Made in Michigan
- Approved by HP Business PC Division.
